PROJECT

College Result Portal

Developed a responsive college result portal to simplify result access by replacing PDF-based result sharing with an easy-to-use web interface. The website includes Home, Results, News, CGPA/Percentage Calculator, and About pages, providing students with quick result searches and basic college information. Built using frontend technologies without a database and hosted on GitHub, helping me gain practical experience in web development, UI design, Git, and GitHub version control.

INTERNSHIP

Completed a 2-month Online Web Development Internship at ExcelR Edtech Pvt. Ltd. in collaboration with APSICHE. Gained hands-on experience in HTML, CSS, and JavaScript, strengthening front-end development, problem-solving, and debugging skills through practical assignments.
